17/05/2022	1.0	Introduction, Problem Statement	Chandan
18/05/2022	1.1	Dataset Information, Architecture Description	Chandan
23/05/2022	1.2	Final Revision	Chandan

We Performed Exploratory Data Analysis on Jupyter Notebook and then created a Power BI Desktop Dashboard.

1. What Kind of Population do we have?

➤ 45.87% People are suffering from heart disease.

➤ Old Aged Men are more (50 to 60 Years) and Females are more in 55 to 65 Years Category.

2. Who Suffer from Heart Disease?

➤ Males are more prone to heart disease.

➤ Old Aged people are more prone to heart disease.

3. What symptoms people experience in heart disease?

- It seems people having asymptomatic chest pain have a higher chance of heart disease.
- Asymptomatic Chest pain means neither causing nor exhibiting symptoms of heart disease.
- It seems high number of cholesterol level in people having heart disease.

- Here we can observe that Blood Pressure increases between age of 50 to 60 and somehow continue the pattern till 70.
- Similarly, Cholesterol and maximum heart rate Increasing in the age group of 50-60.

- we can observe from here that ST depression mostly increases between the age group of 30-40.
- ST depression refers to a finding on an electrocardiogram, wherein the trace in the ST segment is abnormally low below the baseline.
